PREPARED FOR BIC REA LEADERSHIP · OCTOBER 14, 2026

AI Phone Intake Options & Recommendation

How the (310) 963-1569 line could answer, qualify and route callers with an AI assistant behind a short menu — what the market offers, what we recommend, what it costs, and what leadership needs to decide.

- Recommendation: Quo Business with Sona
- About $120–$194 per month
- Forward first, port later

Internal review
For discussion; no decisions taken

BASIS

Vendor pricing pages and legal guidance checked October 14, 2026

Informational briefing. Not legal advice. Prices are vendor-published or third-party figures as noted, exclude taxes and regulatory fees, and must be confirmed at checkout. Call volumes are planning assumptions.

EXECUTIVE SUMMARY

Run the BIC REA line through Quo Business, with its Sona AI agent behind a short menu.

Quo Business (formerly OpenPhone) with its built-in Sona AI agent is the best fit for BIC REA as of October 14, 2026. Of the products checked, it is the only one that documents every requirement inside one call flow: nested "press 1" menus, business-hours branches, a separate voicemail box per menu option, an option that hands the caller to AI, transfer to an outside cell number, and a mobile screen that shows which number was dialed.[1,2]

RECOMMENDED

Quo Business + Sona

4 seats on annual billing; menus, voicemail boxes and AI in one call flow from one vendor.

$120 / $144 / $194

PER MONTH · LOW / MEDIUM / PEAK

RUNNER-UP

RingCentral RingEX Advanced + AIR

Costs more; adds richer AI routing, appointment booking and six languages.

SEAT PRICES UNVERIFIED

~$151 / $241 / $391

PER MONTH · LOW / MEDIUM / PEAK

BUDGET OPTION

Quo Business, 1 seat + Sona

The menu transfers callers to other staff as outside cell numbers. Per-person voicemail without seats is unconfirmed.

$51 / $75 / $125

PER MONTH · LOW / MEDIUM / PEAK

$120–$194	$19.50	$0	~$101
per month all-in for the recommendation, 4 seats, annual billing	one-time cost: text-message (10DLC) registration	to port the (310) 963-1569 line into Quo	realistic low-volume month if ~40% of calls reach Sona (options 2–6 skip it)

Why Quo: fit, not price

Several AI-only receptionists cost less per call. None of the AI-only vendors checked documents separate voicemail boxes per department, which is the core of a "press 1" system.[19,22] Quo's weak points are also documented: Sona leaves the call once it starts a transfer and cannot come back, its help pages do not mention calendar booking, and Capterra reviewers (4.2/5 from 64 reviews) report dropped calls and missed notifications.[4,5,9]

These are acceptable trade-offs for an intake line where a person calls back to close the engagement.

The legal side matters as much as the product

Florida and California both require consent from everyone on a call before recording, and lawsuits under California's wiretap law (CIPA) now target AI call vendors directly. The recording and AI notice must therefore play before any audio is captured, and the vendor contract must forbid using call data for the vendor's own purposes.[41]

For BIC REA the AI's role is deliberately narrow: qualify new project inquiries, route everything else to people, and never touch a specific matter or an attorney's call.

> **Leadership is asked to decide** the vendor, the billing term, the greeting and disclosure wording, the routing of each menu option, the retention period, and the scope of counsel review. The decision checklist is on page 13.

All figures are monthly, assume annual billing, and exclude taxes and regulatory fees. Volume scenarios of 40, 100 and 200 calls a month are planning assumptions, not measured data. This briefing is informational and is not legal advice.

HOW IT WORKS

Three layers decide cost, control and legal exposure.

An AI phone system has three separable layers, and most buying mistakes come from mixing them up. The question that matters most is who holds the call — and therefore who touches the audio.

Phone system with built-in AI

The phone system owns the numbers, menu, hours, voicemail boxes, recording and the staff app. The AI agent lives inside it.

RECOMMENDED

Forwarding AI receptionist

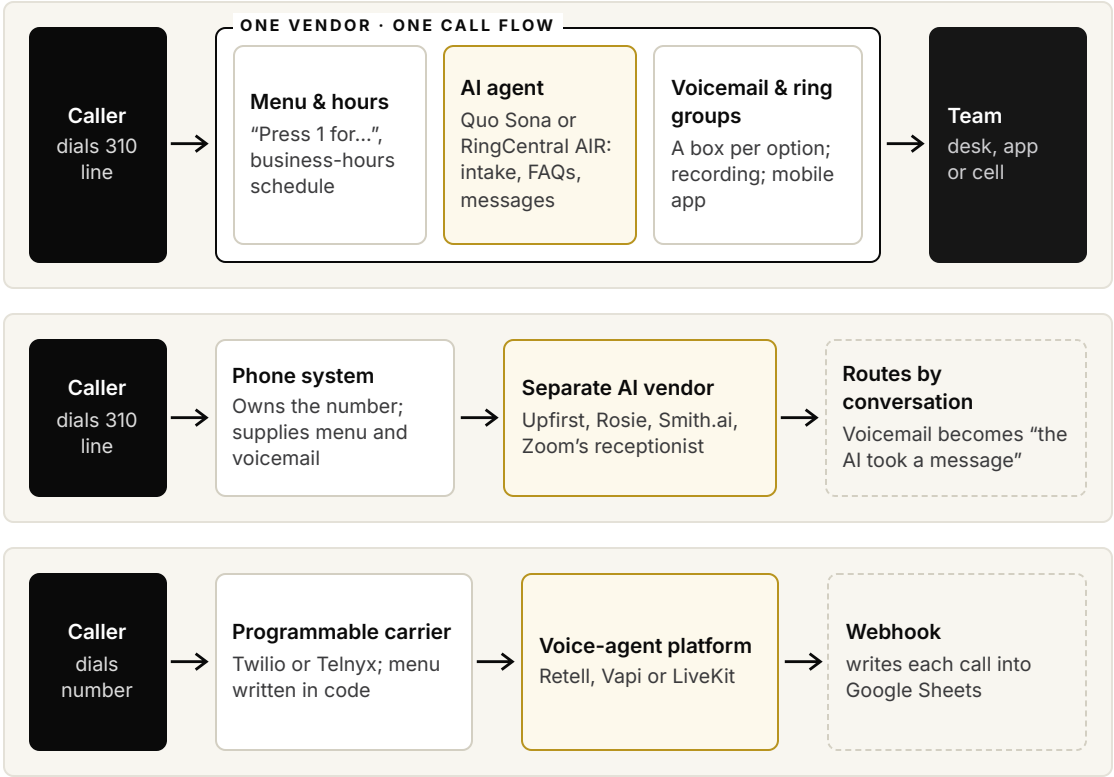

A separate AI service sits in front of any number through call forwarding.

TWO VENDORS

Custom build

A programmable carrier joined to a developer voice-agent platform. The business writes the menu and logic itself.

BUILD & MAINTAIN

Why the layer matters

When the agent is built into the phone system, menus, voicemail boxes and AI live in one call flow and only one company touches the audio. A separate forwarding service usually gives up the phone tree and routes by conversation instead.[37,38]

There is a legal angle too. A San Francisco court dismissed a CIPA claim against Dialpad because its AI transcription was part of its service as a phone provider. Claims against standalone AI vendors ConverseNow and Invoca survived early motions to dismiss under the "capability" test: could the vendor use caller data for its own purposes?[39,40] These are early rulings, not settled law, but they tilt toward an AI agent supplied by the phone provider itself — especially for BIC REA's confidential calls.

Menus help only when they are short

61%
of adults said phone menus hurt the experience

27%
of menu calls abandoned, on average

69%
of 16.7M missed calls got no callback within 48 hours

First two figures: 2019 Vonage survey — dated, but the most recent independent figures we found.[42] Third: Quo's own analysis of missed calls.[8]

Missing the call is worse than a menu. The right design is a short menu of four to six options, with the AI behind most of them and a person reachable in one keypress.

MARKET LANDSCAPE · PHONE SYSTEM LAYER

Quo leads because menus, voicemail and AI share one call flow.

Seven business phone systems compared on the features this line needs. Prices are per user per month, from vendor pages on October 14, 2026, unless flagged as third-party figures.

SYSTEM	PER USER / MO (ANNUAL / MONTHLY)	MENU TIER	EXTRA NUMBERS	AI RECEPTIONIST	NOTES
Quo RECOMMENDED	Business $23 / $33 Scale $35 / $47	Business and up: nested menus, voicemail box per option, AI option	$5/mo; porting free	Sona: 10 calls free, then $25–$199 credit tiers	The vendor page showed two price sets; confirm at checkout[3]
RingCentral RingEX RUNNER-UP	Core $20 / $30 Advanced $25 / $35 Ultra $35 / $45	Multi-level menus listed for older edition names; Core not confirmed	$4.99/mo	AIR $39 add-on (100 min) + $0.50/min	THIRD-PARTY, UNVERIFIED seat prices[12]; AIR price from vendor page[10]
Google Voice	Standard $20 (+ Workspace)	Standard and up	Not public	None	Requires a Google Workspace plan; no AI and no toll-free numbers[14]
Nextiva	Core $15 (promo)	Auto-attendant on all tiers	Not found	XBert $99 / 100 interactions	Annual term required[15]
Aircall	$30 (3-license minimum)	Essentials	$6/mo	50 AI min included, then $0.49/min	3-license minimum, so $90+/mo[16]
Grasshopper	~$14–$80 per account	All plans	$9/mo	AI receptionist announced, no price	THIRD-PARTY PRICES[17]
Zoom Phone	~$10.50–$16	Metered and up	$5/mo	Receptionist $29.99 / 100 min; works with any phone system	Seat prices from a competitor's site; receptionist price from vendor page[18]

What only Quo confirms

- ◇ **Nested menus.** A second-level menu can sit under any first-level option.[1]
- ◇ **A voicemail box per option.** Any option can send callers to a specific box.[1]
- ◇ **AI configured per number.** Each line gets its own greeting and knowledge.[6]
- ◇ **The dialed number on staff phones.** The mobile app shows which Quo number is ringing, plus an assigned emoji.[2]

Reading the table

RingCentral users have asked since 2023 for the incoming-call screen to show which number was dialed, and rely on workarounds based on how call groups are named.[13] Google Voice requires a Google Workspace plan and offers no AI. Aircall's three-license minimum puts it above $90 a month before any AI usage.

Flags mark figures that come from third parties rather than the vendor; treat them as estimates until a quote confirms them.

MARKET LANDSCAPE · AI AGENT AND CUSTOM-BUILD LAYERS

Cheaper per call, but each needs a second vendor or a build.

Forwarding AI receptionists

PRODUCT	PRICE MODEL	ENTRY TIERS (VENDOR PAGES, OCT 14, 2026)	DEPARTMENT VOICEMAIL BOXES	MULTI-NUMBER
Upfirst	Per call	$59.95 / 90 calls; $159.95 / 300; $0.70–$1.50 per extra call	Not documented	Extra agents $9.95/mo[19]
Smith.ai AI	Per call	$150 / 75 calls; Enterprise $500 adds multi-location	Not documented	Enterprise only[20]
Goodcall	Per unique caller	$79 / 100; $129 / 500; $299 / 2,000	Not documented	Scale tier pitched for "several locations"[22]
Rosie	Per minute	$49 / 250 min; $149 / 1,000 (transfers start here)	Not documented	Not addressed[23]
Dialzara	Per minute	$99 / 220 min; $199 / 500; $0.35–$0.48 per extra min	Not documented	Not addressed[24]
Ruby / Abby human + AI	Per minute	Ruby $395 / 100 min; Abby $329 / 100	Live staff take messages	n/a[25,26]
Smith.ai human	Per call	$300 / 30 calls; $810 / 90	Live staff take messages	Free porting[21]

Each would sit on top of a separate phone system that supplies the menu and voicemail: two bills and two vendors handling the audio. Human answering services cost 3–10x more and would put outside staff on confidential BIC REA calls. Recent Smith.ai reviews complain that a prepaid six-month plan was not refunded on cancellation.[27] Air.ai should be ruled out after FTC action against it;[28] Synthflow now sells only enterprise contracts, from $30,000/yr.[29]

Custom-build platforms

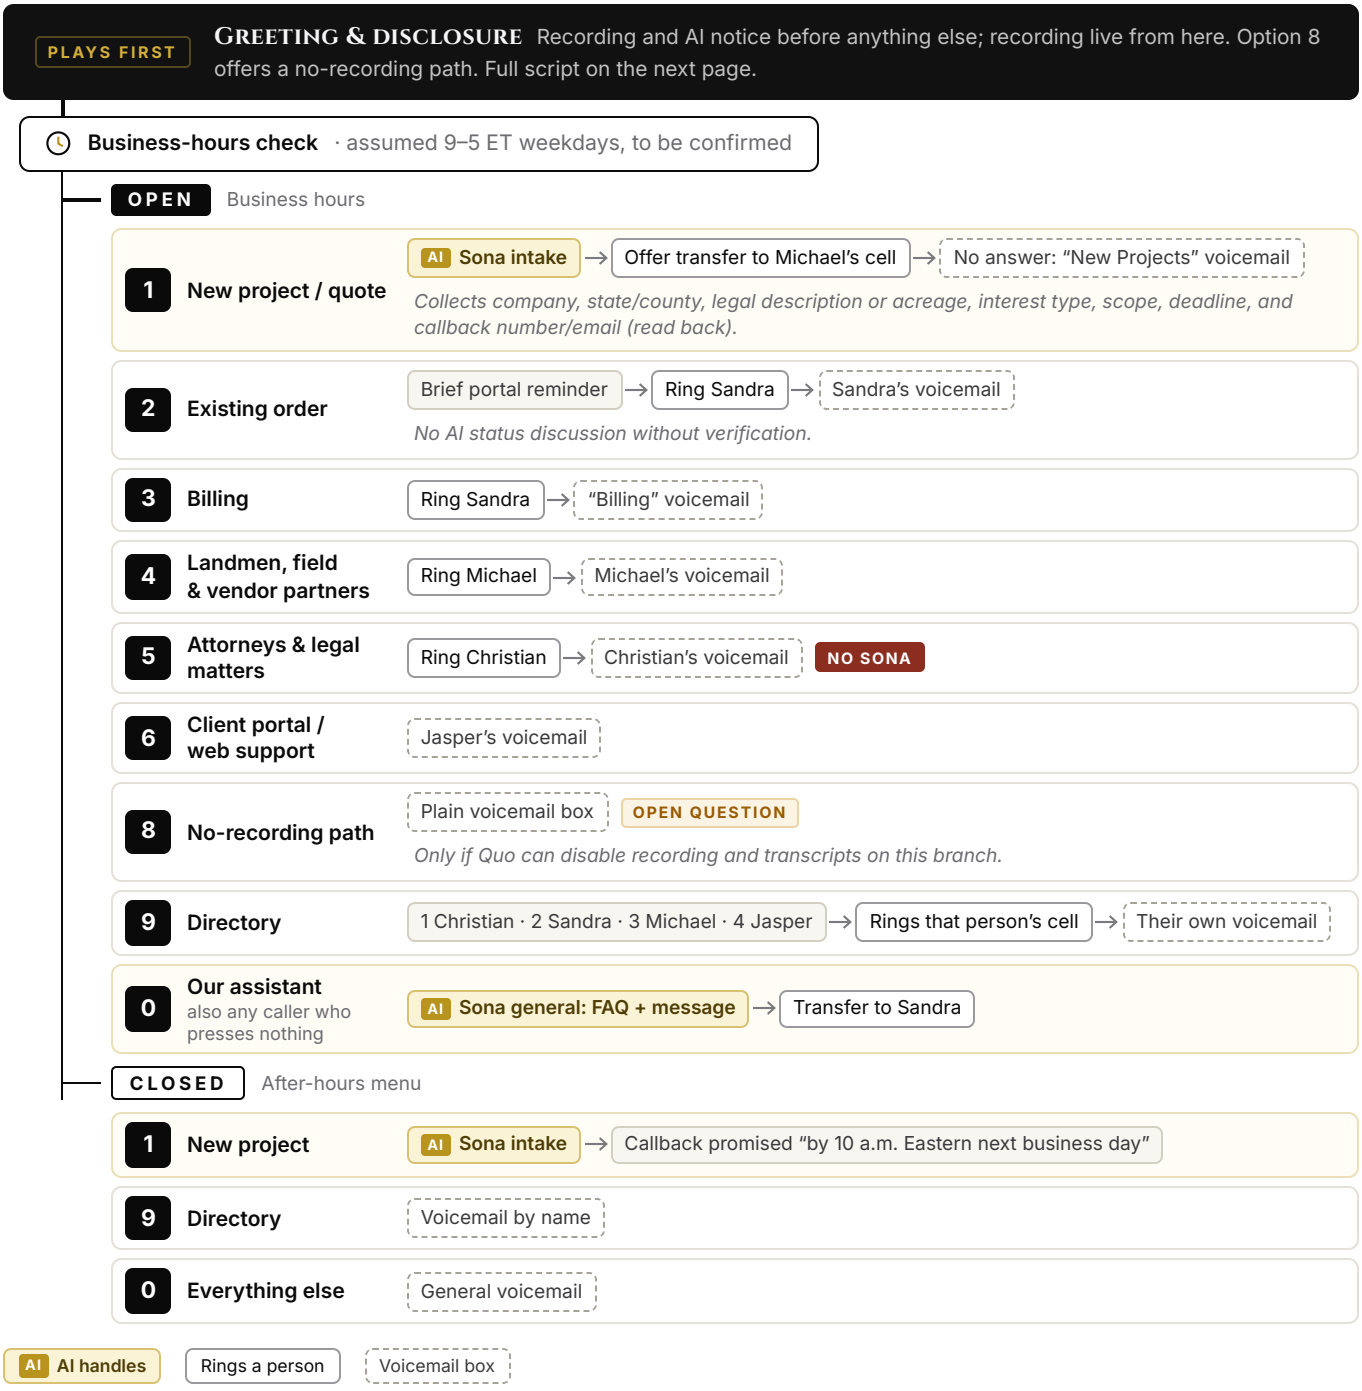

PLATFORM	EFFECTIVE $/MIN (VENDOR RATES; OUR ARITHMETIC)	CONCURRENCY / COMPLIANCE	FIT
Telnyx AI Assistant	~$0.061 all-in; numbers $1/mo	HIPAA on every plan, SOC 2 Type II; rounds to 60-second increments[30]	Cheapest bundled option
Retell AI	~$0.095–$0.109 own telephony; ~$0.094 with your own SIP trunk	20 concurrent calls free; SOC 2, HIPAA-ready[31]	Best-documented warm transfer with a failure path
Vapi	$0.082–$0.129	HIPAA costs $2,000/mo; a Feb 2026 outage dropped 37,806 calls[32,33]	Flexible but riskier
Twilio ConversationRelay	$0.07 + $0.0085 inbound + your own AI model	Native keypad (DTMF) detection; you host the WebSocket server[34]	Most control; most work
LiveKit Cloud	~$0.03 + $50/mo plan	BAA only on the $500/mo Scale plan[35]	Cheapest at scale; code-heavy

Voice quality is no longer the differentiator. Independent tests put real caller-side response gaps at about **1.3–1.75 seconds for every platform**, against vendor claims of 400–800 ms, and rankings change from one benchmark to the next.[36] Prompt tuning and fast tool calls matter more than the platform chosen.

BIC REA · RECOMMENDED CALL FLOW

A GATED INTAKE LINE FOR CONFIDENTIAL WORK.

BIC REA's calls are few but valuable, and often touch acquisitions, litigation or curative strategy. The AI qualifies new project inquiries, sends existing-order callers to the portal or to Sandra, and never discusses a specific matter. Attorney and legal-opinion calls go straight to a person or a voicemail box, never through Sona — every Sona call is recorded and transcribed.[5] The flow sits on the existing +1 (310) 963-1569: forwarded first, ported later.

Staff assignments are our draft; leadership confirms them on page 13.

BIC REA · GREETING SCRIPT

Disclose first, then offer a way out, then route.

The greeting plays before anything else, and recording must be live from its first word. The wording below is our draft; counsel should review it before go-live.

DRAFT GREETING · +1 (310) 963-1569 — FOR COUNSEL REVIEW

DISCLOSURE	"Thank you for calling BIC REA. This call is recorded and transcribed by our phone provider, and you may be assisted by our AI assistant.
OPT-OUT	If you'd prefer not to be recorded, press **8** to leave a message for a callback instead.
MENU	For a new title research project or quote, press **1**. For an existing order, press **2**. Billing, press **3**. Landmen, field and vendor partners, press **4**. Attorneys and legal matters, press **5**. Client portal or website support, press **6**. To reach a team member by name, press **9**. Or press **0** to speak with our assistant."

WHY THIS ORDER

Florida and California require consent from every party before recording. We therefore put the notice first, ahead of any captured audio; counsel should confirm the wording.

A REAL OPT-OUT

Option 8 gives callers who decline recording a way to still reach BIC REA. Whether Quo can switch off recording and transcription on that one branch is an open vendor question.

PEOPLE, QUICKLY

Options 2 through 5 ring a team member (option 2 after a brief portal reminder), and 9 reaches anyone by name. Only options 1 and 0 put the caller in front of the AI.

Guardrails for the AI assistant

- Answers **"yes, I'm an AI assistant"** whenever asked.[43]
- Never uses a staff member's name as its own persona.
- Never quotes binding prices.
- Never gives anything that sounds like a title opinion.
- Never discusses a specific matter; existing orders get no AI status update without verification.
- Attorney and legal-matter calls (option 5) never reach Sona.
- Reads back the callback number and email before ending an intake.
- Every Sona call is recorded and transcribed, so what it is allowed to collect is limited by design.[5]

On a new project inquiry, Sona collects the company, state and county, legal description or acreage, interest type, scope and deadline, then reads back the callback number and email. It then offers a transfer to Michael's cell; an unanswered transfer lands in the "New Projects" voicemail box.

BIC REA · PRICE BREAKDOWN

About $120 to $194 a month, all-in.

Quo Business, four seats, with Sona — under three planning scenarios of 40, 100 and 200 calls a month. Sona is priced conservatively, as if every call reaches it.

LINE ITEM	LOW 40 CALLS	MEDIUM 100 CALLS	PEAK 200 CALLS
Quo Business seats: 4 × $23	$92	$92	$92
Numbers: the 310 line uses an included seat number	$0	$0	$0
Sona AI agent, assuming every call reaches it Credit tier sized to the call volume	$25 Tier 2 · 40 calls	$49 Tier 3 · 100 calls	$99 Tier 4 · 250 calls
10DLC texting campaign fee Quo charges $1.50–$3; the higher figure is used	$3	$3	$3
Monthly total · annual billing	**$120**	**$144**	**$194**
Same with monthly seat billing (4 × $33 = $132)	*$160*	*$184*	*$234*

Check: $92 + $0 + $25 + $3 = $120 · $92 + $49 + $3 = $144 · $92 + $99 + $3 = $194. With monthly billing: $132 + $25 + $3 = $160 · $132 + $49 + $3 = $184 · $132 + $99 + $3 = $234. Source: Quo pricing page, October 14, 2026.[3]

One-time costs

10DLC text-message registration	**$19.50**
Porting the (310) 963-1569 line	**$0**
Counsel review of the greeting	NOT PRICED

Realistic usage is lower

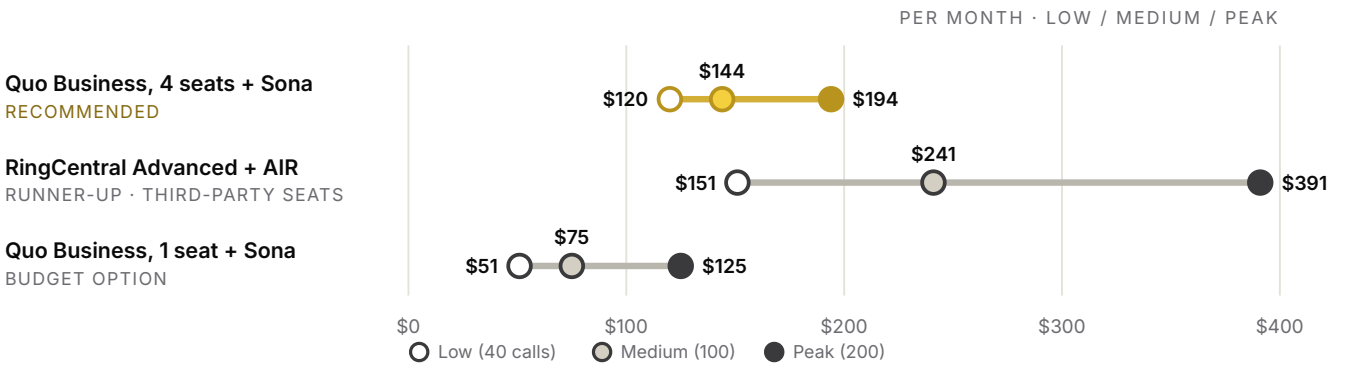

Options 2–6 skip Sona, so far fewer calls consume credits. If about 40% of 40 calls reach Sona (16 calls), the 10 free calls plus 6 × $1.00 overage come to **$6, not $25**.

That brings the realistic low-volume month to about **$101** ($92 + $6 + $3).

SONA CREDIT TIERS REFERENCED ABOVE

10 calls a month included. Paid tiers: $25 for 40 calls · $49 for 100 · $99 for 250 · $199 for 600. Overage on the free tier is $1.00 per call. Whether the 10 free calls stack with a paid tier, and whether tiers can change month to month, are still open with Quo.[3]

How the three options compare

Monthly cost at 40 / 100 / 200 calls; detail on the next page. RingCentral rests on third-party seat prices and 3 minutes per call.

BIC REA · RUNNER-UP AND BUDGET OPTION

What the alternatives cost, and what they buy.

Runner-up: RingCentral RingEX Advanced + AI Receptionist (AIR)

Assumes 4 Advanced seats at $25 (third-party price), AIR at $39 for 100 minutes plus $0.50 a minute after that, and a $1.50 texting fee, at an assumed 3 minutes per call.

LINE ITEM	LOW	MEDIUM	PEAK
AI minutes at 3 min per call	120 min	300 min	600 min
RingEX Advanced seats: 4 × $25 UNVERIFIED	$100	$100	$100
AIR base, 100 minutes included	$39	$39	$39
AIR overage at $0.50/min	20 min = $10	200 min = $100	500 min = $250
Texting fee	$1.50	$1.50	$1.50
Monthly total	**~$151**	**~$241**	**~$391**

Exact sums are $150.50, $240.50 and $390.50, rounded here. RingCentral's own blog also cites a $59 "AIR Everywhere" price; confirm the SKU.[10,11]

What the premium buys: AIR books appointments, routes by department or location, speaks six languages, and comes from a phone provider — a point that helped RingCentral win dismissal of the federal wiretap claims in *Lisota*.[41]

Budget option: one Quo Business seat + Sona

The menu sends calls to the other staff as outside cell numbers.

LINE ITEM	LOW	MEDIUM	PEAK
Quo Business seat: 1 × $23	$23	$23	$23
Sona credit tier (as on the previous page)	$25	$49	$99
10DLC campaign fee	$3	$3	$3
Monthly total	**$51**	**$75**	**$125**

OPEN QUESTION Whether separate voicemail boxes per person work without a seat for each person.

What each option gives up

OPTION	STRENGTHS	KNOWN GAPS TO CONFIRM
Quo Business, 4 seats	Menus, per-option voicemail and AI in one call flow; dialed number shown on staff phones; AI supplied by the phone provider	Sona leaves the call once it starts a transfer; calendar booking not documented; reviewers report app reliability issues
RingCentral + AIR	Booking, routing by department or location, six languages; phone-provider AI helped win dismissal in *Lisota*	Seat prices unverified; AIR SKU ($39, $49 or $59); multi-level IVR on Core or Advanced; dialed-number display relies on workarounds
Quo Business, 1 seat	Same platform and call flow at the lowest monthly cost	Per-person voicemail without seats unconfirmed; transfers to personal cells risk the cell's own voicemail

These points are made elsewhere in this briefing and gathered here to weigh the options side by side.

COMPLIANCE CHECKLIST

Consent comes first, and the vendor contract is part of the consent.

> **Informational only — not legal advice.** This summarizes the legal guidance we reviewed, for discussion. Counsel should review the greeting, the routing of attorney and privileged calls, and any marketing texts before go-live.

Florida. Recording is lawful only with prior consent from all parties; a violation is a third-degree felony.[44]

California. § 632.7 bars recording cell-phone calls without consent whether or not the call is confidential, and § 637.2 allows **$5,000 per violation**.[45] In *Kearney*, California law applied to calls made from California to an out-of-state firm — so BIC REA's notice must play on every call.

AI disclosure. No California or Florida law clearly requires disclosing AI on an *inbound* call, and the FCC's proposed rule on AI-generated calls expressly exempts inbound virtual agents.[47] Disclosing upfront is still the cheap, defensible choice.

Pending reform. A bill to curb CIPA suits (SB 690) leaves §§ 631/632 unchanged.[46]

- ☐ **Recording and AI notice as the very first audio; re-disclose on conference calls** — BEFORE GO-LIVE
  Required on every call (Florida, plus California callers).
- ☐ **A real opt-out path** — CONFIRM WITH QUO
  Option 8 voicemail for callers who decline recording; Quo must confirm that transcription can be turned off on that branch.
- ☐ **Truthful "are you AI?" answer; no human persona name** — IN THE SCRIPT
  Also no price quotes and no title opinions.[43]
- ☐ **Vendor data-use terms (DPA)** — BEFORE GO-LIVE
  No model training or product improvement on audio or transcripts, deletion on request, SOC 2. A must-have before go-live.
- ☐ **Confidentiality of title matters** — COUNSEL REVIEW
  Never route attorney or privileged discussion through AI transcription; option 5 bypasses Sona entirely.
- ☐ **Retention and access** — LEADERSHIP DECISION
  Keep recordings 30–90 days unless tied to an order file; access limited to the 4 staff.
- ☐ **Texting (SMS) and 10DLC** — WEEK 1
  Consent captured on the call, STOP honored, and a separate 10DLC brand registration in BIC REA's name.[48]
- ☐ **Outbound AI calls** — POLICY
  Avoid; the TCPA treats an AI voice as an artificial voice.
- ☐ **Florida mini-TCPA (FTSA) for marketing texts** — COUNSEL REVIEW
  Review with counsel before any marketing texts are sent.

ROLLOUT PLAN

Forward now; port the 310 line once the system is stable.

Forwarding can be undone instantly. Porting cannot. Ports commonly fail when account details don't match the losing carrier's records or the port-out PIN is missing, and texting service moves separately from voice.[49]

WEEK 1

Confirm and build

- Get written answers to the vendor questions (page 12), including a signed DPA.
- Open a dedicated BIC REA Quo workspace so the brand, 10DLC registration and data stay separate.
- Build the menus on new Quo numbers.
- Submit 10DLC registration now; approval takes days to weeks.

WEEK 2

Test before live callers

- Call every option, in and after business hours.
- Does the caller's own number come through on forwarded calls?
- Time until the greeting starts.
- A transfer where the cell's voicemail answers.
- "Are you a human?"
- The no-recording option; Spanish.

WEEKS 3–8

Forward and measure

- Forward (310) 963-1569 to its Quo number — conditional (no-answer) forwarding first if possible, then full forwarding.
- Track calls the AI resolves, how often it transfers, hang-ups in the first 15 seconds, and callbacks met on time.

AFTER 30–60 STABLE DAYS

Port the 310 line

- Have the account number, port-out PIN and a recent bill ready.
- Most ports finish in 3–7 business days with no interruption.[7]
- Cancel the old service once the port completes.

WHAT QUO SAYS ABOUT PORTING

Most ports finish in **3–7 business days** with no interruption in service. A2P texting registration is done separately, and the customer cancels the old service themselves.[7] Port-in is free.[3]

OWNER TASK, BEFORE THE PORT

Identify the current carrier for (310) 963-1569 and confirm the port-out PIN is in hand. Account details must match the carrier's records exactly.

Success measures for weeks 3–8

MEASURE	WHY IT MATTERS
Calls the AI resolves	Shows whether Sona is doing useful intake or only taking messages
Transfer rate	Each transfer is a point where Sona leaves the call and cannot return
Hang-ups in the first 15 seconds	The cost of the disclosure and the menu length
Callbacks within the promised time	After-hours intake promises a callback by 10 a.m. Eastern the next business day

These are the four measures we propose to track; targets are for leadership to set.

RISKS AND OPEN QUESTIONS

What can still go wrong, and what to ask the vendors.

Transfer handoff

The biggest product risk. Once Sona starts a transfer it leaves the call; an unanswered transfer goes to that person's voicemail, or for a shared inbox to voicemail regardless of that inbox's call flow.[4] Test that the intended box catches each failed transfer.

Personal cell voicemail

A transfer to a personal cell can be swallowed by the cell's own voicemail. Per-option Quo voicemail boxes should be the fallback, not the cell.

App reliability

Reviewers report reliability problems with Quo's mobile app, including dropped calls and missed notifications.[9]

Unsettled law

No appeals court has decided whether the capability or extension test applies to AI voice agents, and we have not verified Florida's civil damages terms.

ASK QUO	ASK RINGCENTRAL (RUNNER-UP) AND ALL VENDORS
Will you sign a DPA barring use of audio, transcripts and Sona data for training or product improvement, with set retention and deletion?	The same DPA question; whether AIR costs $39, $49 or $59, and its overage terms
Can recording and voicemail transcription be turned off on one menu branch (options 5 and 8)?	Is multi-level IVR included on Core or Advanced?
Do per-person voicemail boxes need a paid seat, or can they be workspace voicemail boxes?	Does the mobile app show which number was dialed on incoming calls?
Can Sona tiers change month to month? Do the 10 free calls stack with paid tiers?	**All vendors:** does the caller's number pass through on calls forwarded from the current carrier?
Does the iPhone incoming-call screen show the inbox *name*, or only the number and emoji?	
Can Sona transfer into a phone menu, and can it book appointments on Google Calendar?	
Owner task: who is the 310 line's current carrier, and is a port-out PIN in hand?	

Put the DPA question first. Response times and voice quality are now similar across vendors, at about 1.3–1.75 seconds on real phone calls. What varies is whether menus, voicemail boxes and AI sit in one place, and whether the company handling the audio is contractually barred from reusing it.

DECISIONS NEEDED FROM LEADERSHIP

Seven decisions before Week 1 can start.

Each item follows from the preceding pages, and the answer options are suggestions. Where we have made an assumption or drafted wording, it is shown here as a decision to confirm rather than a settled choice.

01 **Approve the vendor**

Quo Business, 4 seats, with Sona ($120 / $144 / $194 a month). Alternatives: RingCentral RingEX Advanced + AIR (~$151 / $241 / $391) or one Quo seat ($51 / $75 / $125).

- ☐ Quo, 4 seats
- ☐ RingCentral + AIR
- ☐ Quo, 1 seat

02 **Choose the billing term**

Annual seat billing ($120–$194 a month) or monthly ($160–$234 a month).

- ☐ Annual
- ☐ Monthly

03 **Approve the greeting and disclosure**

The draft on page 7: recording and AI notice first, option 8 opt-out, then the menu. Subject to counsel review.

- ☐ Approve as drafted
- ☐ Revise

04 **Confirm who answers which option**

As drafted: 1 Sona, then Michael · 2 Sandra · 3 Sandra · 4 Michael · 5 Christian (no Sona) · 6 Jasper's voicemail · 9 directory · 0 Sona, then Sandra.

- ☐ Confirm
- ☐ Reassign

05 **Confirm business hours and the after-hours promise**

Assumed 9–5 ET weekdays; after-hours callback promised "by 10 a.m. Eastern next business day."

- ☐ Confirm
- ☐ Change

06 **Set the retention period**

Recordings kept 30–90 days unless tied to an order file; access limited to the 4 staff.

- ☐ 30 days
- ☐ 90 days
- ☐ Other: _____

07 **Authorize counsel review and the DPA gate**

Counsel to review the greeting, the routing of attorney and privileged calls, and FTSA for marketing texts. No go-live without a signed DPA from the vendor.

- ☐ Authorize
- ☐ Discuss
